

Modena

One of the most natural leathers in our collection, Modena is a full aniline leather with only a small quantity of dyes and waxes sprayed on the surface to give the color wonderful depth and dimension. At the final stage of processing, we give the leather a feel coat which gives Modena a spectacular wet hand-feel. This leather is more delicate and does not have high resistance to scratching. Be careful not to expose it to direct sunlight as it could cause the color to fade

Specifications

Average Hide Size: 50 Square Feet

Configuration: Whole Hide

Hide Source: European

Thickness: 1.0-1.2 mm

Finish: Aniline

Resistance to Scratching: Low Resistance

Flammability: NFPA 260 Pass, CAL 117 Pass

Anti-Soil Treatment: Not available For This Article

Care and Cleaning

Leather is a natural material and, if properly cared for, will maintain its beauty and usefulness for many years. Direct exposure to strong light can cause any leather color to fade, so always protect leather from direct sunlight and other intense light sources. It is also advised that leather products be kept away from radiators or other generators of heat. Periodic dusting and vacuuming is recommended for normal maintenance of leather. Should leather get marked or stained, please use only mild soap and water and first test a discrete area before treating the affected spot. Do not use Saddle Soap, cleaning solvents, oil, or abrasive cleaners.

** For Suede, Transfer, Hair on Hide and Customized non-standard leather – please contact the Demar Leather main office for additional information
